**Open Source Software (OSS) plays a significant role in any software projects today.**
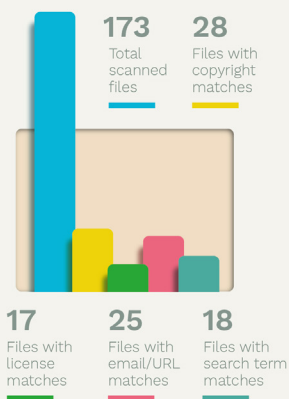

OSS may be "free", but this does not mean that it is free of license and obligations.

Whether you are looking for investment, pursuing an acquisition or merger, or simply wish to make sure that your IPR are protected, an OSS audit of the Target code will give you insight to Legal and Security risks associated to the components in use.

Open tasks

02 Review
03 Remediation

Additional evidence

173 Total scanned files
28 Files with copyright matches

17 Files with license matches
25 Files with email/URL matches
18 Files with search term matches

02 Priority 4 items
08 Priority 1 item

27 Legal OSS Items

13 Priority 3 items
04 Priority 2 items

150 Low Severity
214 High Severity

547 Security Vulnerabilities
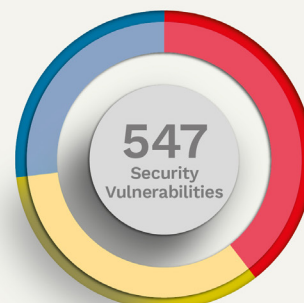

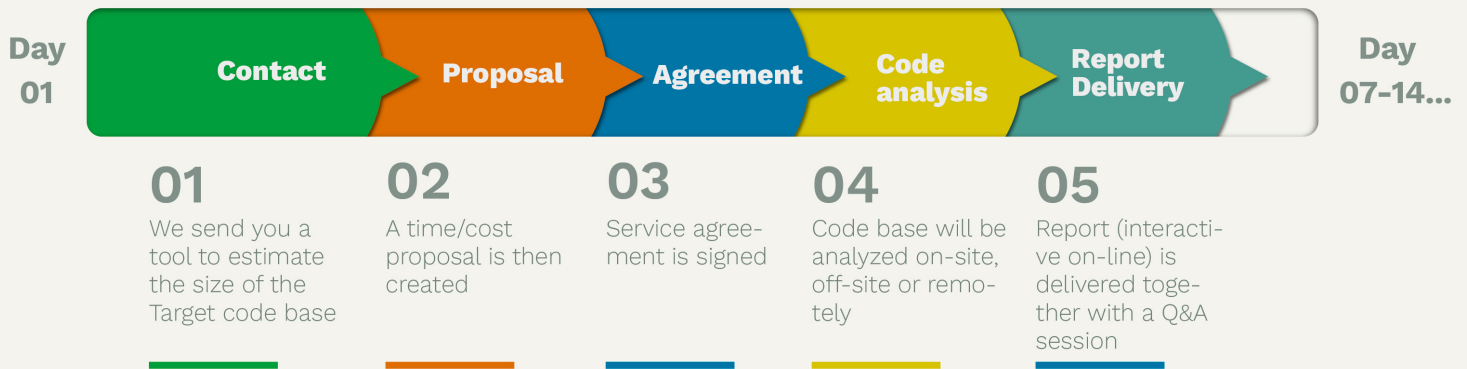

183 Medium Severity

Using the world's most comprehensive and advanced knowledge base of OSS Components, our Open Source audits are among the most reliable assessment available.

Reports

Our reports include:

- List of all OSS components (full or just snippets) found in Target Code
- Location of each components
- Licenses in effect and classification of these (Permissive, Reciprocal, unknown and proprietary)
- Full license text and explanatory
- Obligations and potential restrictions, together with copyright details
- Security vulnerabilities with link to NVD and other sources

Simple Process:

| Day 01 | Contact | Proposal | Agreement | Code analysis | Report Delivery | Day 07-14... |

01
We send you a tool to estimate the size of the Target code base

02
A time/cost proposal is then created

03
Service agreement is signed

04
Code base will be analyzed on-site, off-site or remotely

05
Report (interactive on-line) is delivered together with a Q&A session

Code Experts Audit Team

Having performed hundreds of orders for small to mid-size companies as well as some of the largest enterprises across the globe, Code Expert's professional team of highly experienced auditors are setting the new standard for OSS audits.

Quality, speed and cost are important factors for our clients and why they select us as their trusted partner.

We use a mix of the best and most advanced scanning tools like Flexera Code Insight™.

About Code Experts
